

With more than 25 years of experience in highway safety, Versilis has developed various automated access control solutions that meet the highest industry standards. Road authorities across North America have adopted our solutions to increase the safety and efficiency of their traffic operations. With motorist and operator safety in mind, Versilis engineers bring experience and ingenuity to each project, from planning to installation, testing and training.

PRODUCTS AND SERVICES

Patented

HSG-40CW & HSG-22CW

- Horizontal crashworthy pivoting gates (from 1,2 m to 12,2 m)
- Crash tested to MASH requirements
- HSG-22CW - reduced footprint
- Ideal for high speed facility access control

VSG-40 & VSG-22F

- Vertical pivoting gates (from 0,6 m to 12,2 m)
- Designed per AASHTO LTS-6 2013*
- Ideal for tunnel and bridge access control
- VSG-22Fast Acting: deploy/retract time 5 sec.

*Some exceptions may apply

Patented

HSG-18CW

- Horizontal crashworthy pivoting gate (from 0,6 m to 5,5 m)
- Crash tested to NCHRP 350 requirements
- Ideal for high speed facility access control

SWIFTSIGN

- Automated pivoting warning sign
- Small footprint and easily installed on any concrete barrier
- Ideal for permanent or work zone advance warning signage

INTEGRATION SERVICES

- Universal local and remote control options for all products
- Highly configurable solution to meet all types of applications
- Ease of integration with other ITS devices such as lane control signs, flashing beacons, blankout signs, etc.
